Persons of Consumptive Habits, Read This! TO THE GREFENBURG COMPANY : For the first time

in my life am induced to cert fy to the truly wonder-ful effects of a popular medicine, but in sending you the certificate I feel that I am only discharging a duty that I owe to the Græfenberg Company, and more especially to Atout the first of June last I had a negro man taken with a Cough, attended with resilessness, spitting of blood and other dangerous symptoms of consemption. I immediately called in a truly skilful and scientific physician, who told me it was a case of consemption. He treated him for ceveral weeks, but he gradually grow worse. I then bad another physician of great reputation in 1 mg di eases. He examined him, and also decided it to be a hopeless care of ons mption, and said it was uncless to spend money in try-

cons. implied, and said it was dicless to spend money in trying to cure him.

I had previously promised the Gravenberg Agents here,
(Messrs Wells & Lowell,) that when the doctors gave him
up I would rry the Gravenberg Coursumptive's Balm. I did
so and to my assreade surprise, the man began to improve

THE GREATEST INVENTION OF THE AGE. West's Patent Galvanic Cement

For Roofing. THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had relentific men experimenting, and that it has been the study of Architects and Builders, for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire an water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the people with. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that they be-come usele s, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumbly, and worthless; whereas, the inventor of the Galwenic Cement, has inhored twenty years to combine articles to obviate those difficulties, and can testify from his long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best at cler ever before known. The combination of this Cement is such that it is calculated for entire new roofs, flat or steep, cov-ering over old shingles without removing them; libing eave-troughs, seaming around battlements, chimneys and sky-lights. Covering car-tops, steamer-decks, &c. This Cement, by its non-conduction and galvanism, prevents metal roofs from rusting and unsoldering, and resists the extremes of heat and cold, better than any thing ever in-vented, for entire roofs or for covering metal and the out ide of wood bu ldings, making them fire proof. Its ap-pearance is like skate; beausiful for the rich palace or the nble costage. The undersigned having secured the right to the State of suncesses, will sell rights of Territory, by Counties or

Towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

This Roof is now being put on in this city, for the benefit of all concerned, and warranted to excel all other modes of Roofing. The subscriber has lad his mode of Roofing tested as lo its qualities, during the last year and a half in the city of Memphis, which has proved satis sctory, to which a number of the nost prominent citizens can testify. For further information enquire at the office, where amples may be seen. Office with A. V. S. Lindsley, Real Estate Broker, No. 83, College street, Nashville, Term.; ot, address box 69, P. O.

Attached is a note from John L. Morgan, Esq., Archi-ect, by which may be seen the opinion of Mr. Samuel Sloan, the c-lebrated Architect, and writer upon Architecure, whose experience with this mode of roofing, without a doubt, is satisfactory to all. a doubt, is satisfactory to all.

MEMPHIS, March 12, 1857.

Ma. W. S. BENSETT,—When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Sloan Work on Architecture. I asked his opinion as to the durability. &c., of Weat's Patent Roof, such as you are using in the city of Memphis, and he hid one Double had no healthfair in asylar to me. and he told me that he had no hesitation in saying to me that it is a good and durable roof, and is all that its advo-cates cial u it to be; farther saying that he is using it on a fine building for himself. Respectfully.

JOHN L. MORGAN, Architect.

MEMPHIS, March 2, 1857.

W. S. BENNETT, ESQ.—Dear Sir.—The facts within our knowledge of the durability, &c., of West's Galvanic Gement; are these: The building you covered for us last spring, I am happy to state tax ans ered our expectations. We can therefore recommend it to the public for all roofing purposes; as a light chesp, fire and water proof roof.
It does not get soft and run from the effects of the heat of
the sun; nor does it harden and crack from the effects of the cold. Any persons wishing to know more of this ar-ticle, can call at our manufactory. N. S. BRUCE & CO.,

CURTIS & KNAPP, Iron Founders. Mauram, Jan. 14, 1957 Mr. Bennett, has done some small amount of roofing for me in his peculiar way, with Cetton stuff, coated with a preparation the basis of which appears to be a Coal Tar. It is a very effectual and light roof, and appears to promise considerable dorability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influence of the air and water. The Composition does not liquify and run from the effects of the heat of the sun in summer, nor does it harden and crack from the influence in the cold of winter, A. P. MERRIL.

PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

THE undersigned is prepared to introduce into use in Toppessee W. E. CHILDS & CO.'S PATENT ZLAS-TIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Comnies, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fall to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth sur-

It contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good sheathing, old shingles, tar and gravel, tin, sinc, expect, or iron roofing the making no difference how steep or flat they may be recommended any new one hundred source feet; it being the -it making no difference how steep or flat they may befor seven dollars per one hundred square feet; it being far
chest er than any Roof of the old style, and we are sure it
sitigive better satisfaction.

It will also be found to be the best thing ever invented to
gover or mend old leaky in, far and gravelroofs, or around
chimneys, scuttles, dormar windows, and gutters, where the
tin is rusted through. This Cement can be put on to last
as long as stone, and form a perfect adhesion to any oblect to which it is applied. The Roofs can be painted over
(and warranted not to leak) at two dollars and fifty cents
per hundred square feet, which is cheaper and much bettear than paint. This Roofing will be found to be the best
theng for covering large Roofs where they are exposed to
fir —such as Steam Mills, Saw Mills, Factories, flaifroad
Cars, Stridges, Depots, Station Houses, Steamboat Decks,
and, in fact, every kind of Roof where there is an external
exposure from fire. As the Roof is perfect, without a joint
a it, it presents no chance for fire to communicate, and any n it, it presents no chance for fire to communicate, and any ight substance will burn out without igniting.

"Insurance Offices at Cincinnati, and other places shere Childr & Co.'s Cement has been used, insure Buildings with Roofs covered with this Gement, at the same rates as for those covered with Iron, Copper or Tin.

This is a purely vegetable compound, prepared on strictly scientific principles, after the manner of the celebrated Holland Professor, Boerhave. Because of its great success in most of the European States, its introduction into the United States was intended more especially for those of our fatherland scattered here and there over the face of this mighty country. Meeting with great success among them, I now offer it to the American public, knowing that its truly wonderful medicinal virtues must be acknowledged. It is particularly recommended to those persons whose constitutions may have been impaired by the continuous use of ardent spir its, or other forms of dissipation. Generally instantaneous in effect, it finds its way directly to the seat of life, thrilling and quickwning every nerve, raising up the drooping spirit, and, is fact, infusing new health and vigor in the system.
